DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 7 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-4, and 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dubois (US 4100455) in view of Ogawa (US 4803399).

DuBois discloses a fluorescent display device comprising a vacuum envelope constituted by a face plate, an anode side substrate and side plates, and cathodes arranged between face plate and anode side substrate. See fig. 4. In addition, DuBois discloses a metal sheet with multiple perforations disposed on the whole rear surface of the face plate. See claim 1(b) and column 5 lines 35-40. The opening and non-opening portions are arranged in a lattice like manner, see fig.

Application/Control Number: 09/895,322

Art Unit: 2875

3. Dubois does not disclose an aluminum reflector, but Ogawa teaches the use of aluminum as a reflector. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the aluminum of Ogawa as the material of the reflector of DuBouis because aluminum is a common material that reflects well.

Regarding claim 6, the metal film of Dubois is partially varied in light transmittance, by virtue of its having opening and non opening portions.

Regarding claim 7, Dubois discloses the opening and non opening portions formed at a portion of the metal film corresponding to a display section, and a solid portion at a peripheral portion of said metal film, see figure 4.

Allowable Subject Matter

Claim 5 is allowed. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record neither shows nor suggests a void portion in the metal film for deposition of a getter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sumati Krishnan whose telephone number is 703-305-7906. The examiner can normally be reached on 8:00 am - 4:30 pm..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea can be reached on 703-305-4939. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9318 for regular communications and 703-872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
